Third-Year BSc(Hons) Computer Science Student passionate about building impactful digital products. With hands-on experience across the Java Spring Boot and Javascript, I bridge the gap between frontend aesthetics and backend stability. Having developed and deployed multiple full-cycle applications, I thrive in environments that require rapid learning and iterative development. Committed to writing maintainable code and delivering seamless user experiences.

SKILLS

- Java, Spring Boot, NodeJS
- HTML, JS, CSS
- Git
- Postman
- PostgreSQL, MySQL, MongoDB
- Problem-Solving
- Communication
- Creativity
- Leadership
- Teamwork

EDUCATION | CERTIFICATIONS

BSc (Hons) Computer Science

(Apr 2024 – present)

University of Sri Jayewardenepura (Colombo, Sri Lanka)

Major GPA: 3.7/4.0 (Cumulative: 3.5/4.0)

Relevant Coursework: Data Structures & Algorithms, Object-Oriented Programming (Java), Database Systems, Software Engineering.

Python & Data Science Workshop Certification

(2025)

PyData Sri Lanka – University of Sri Jayewardenepura

Completed a **5-day (10-hour) Python and Data Science workshop** conducted by PyData Sri Lanka at the University of Sri Jayewardenepura (Jan 2025). Gained practical experience in **Python programming, data analysis, and data science fundamentals**, and successfully completed a **hands-on data science project**.

GCE Advanced Level

(2022)

Royal College, Colombo 07.

Chemistry, Physics, Combined Mathematics – BCC

EXPERIENCE

SLT-Mobitel Code Blast 2.0

(2025)

- Project Lead of Team CodeCatalysts for Code Blast 2.0 organized by SLT-MOBITEL and qualified for the final stage.

CODESPRINT X

(2025)

- Participated as Team CodeCatalysts for CODESPRINT X and qualified for the second stage.

J'puraXtreme 2.0

(2025)

- Participated as Team Codenators for the J'puraXtreme 2.0 organized by IEEE computer society- USJ

PROJECTS

Hivebliss

(2026)

Developed and deployed a production-ready full-stack e-commerce platform for a Sri Lankan small business, handling the complete order lifecycle from product browsing and cart management to payment verification and fulfilment. Engineered a custom bank transfer payment flow with WhatsApp confirmation tailored to the local market, alongside automated PDF receipt generation, real-time stock reservation logic, and transactional email notifications. (React.js, Node.js, Express, MongoDB, Cloudinary, Resend, JWT, Vercel, Render)

MailForge

(2025)

Developed a modern email management platform supporting composing, sending, receiving, and organizing emails through a **responsive interface** and scalable backend. Implemented **AI-based email summarization**, **full-text search** for fast email retrieval, and **productivity features** such as **keyboard shortcuts** to improve user efficiency. (React.js, Spring Boot, REST APIs, Gemini API, Full-Text Search)

UniSync

(2025)

Collaborated in a team to architecture a centralized university platform to unify academic workflows, streamline internal communication, and facilitate event planning and resource coordination. Crafted interactive, **usercentric UIs** using ReactJS to improve usability and engagement across student and administrative portals (ReactJS, SpringBoot, PostgreSQL)

Wine Analysis Dashboard

(2024)

Collaborated in a team to develop an **interactive data analysis** and visualization platform to explore wine reviews and characteristics. Applied **natural language processing** techniques to analyze textual reviews and generated insights through an intuitive dashboard with interactive visualizations for effective data exploration. (Python, Plotly Dash, Pandas)
